## DAVID PAYNE'S SEA KAYAKS

Sea kayaking is the waterborne equivalent of bicycle touring. Sea kayaks have the ability to handle rough water, which opens up many areas to explore. Their stowage capacity allows one to make camping tours to places where many other boats are unable to go. The peace and quiet that goes with these boats is a major attraction. Many people also enjoy just getting a couple of hours weekend exercise in a sturdy and capable craft.

These sea kayaks have been designed by well known Sydney designer David Payne, originally for building on a jig. BoatCraft have developed the design by converting it to a CAD program which enables all the panels to be laser or router cut to very high accuracy for stitch and glue construction. Both single and double kayaks are available. Boats can be personalised by adding hatch openings, rudders or skegs as required, for either long distance touring or shorter recreational paddling.

Laser cut panels are supplied as part of a complete hull construction kit, which includes precut premium light weight Gaboon marine plywood, timber for sheer stringers, Bote-Cote epoxy, fibreglass tape and cloth, plus even a foam seat and rope handles. Detailed building instructions and plans are provided. All the owner has to do is remove the parts from the plywood sheets and start coating and assembling. Some glueing, laminating, and sanding later, and the boat is ready for painting. You'll need a few basic woodworking tools, but no special tools, boatbuilding or woodworking skills, are needed.

At 650 mm beam the boats have excellent stability, and the buoyant shape and cambered deck offers generous storage. Built in buoyancy is also an essential safety feature. The cambered deck and lower freeboard makes for easy paddling without having to reach outboard with the paddle. These kayaks do not need a rudder, they track well, but turn easily by leaning into turns and sweeping with the paddle. The kayaks weigh in at less than 20 and 25 kg respectively, so they can be handled easily by one person, and they can be carried on any car roofrack.

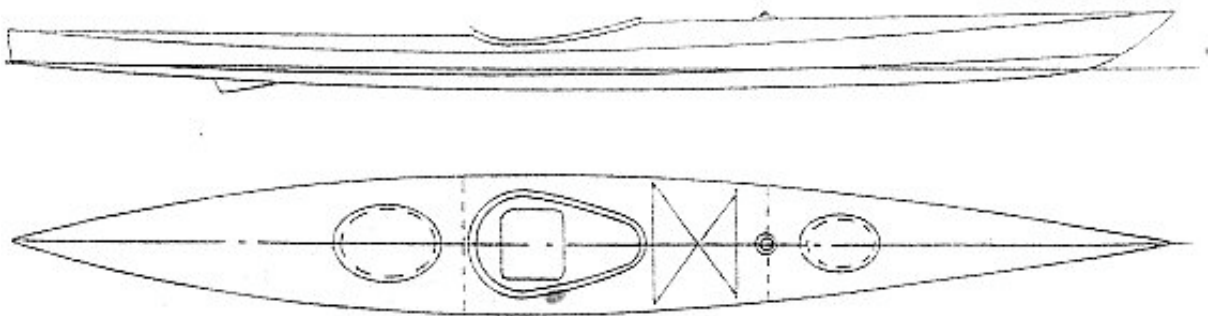

SINGLE KAYAK  
DOUBLE KAYAK

length 5.5 m, weight 19.5 kg  
length 6.1 m, weight 24 kg

KIT PRICE \$825.00 plus delivery (inclusive of GST)  
KIT PRICE \$985.00 plus delivery (inclusive of GST)  
PAINT KIT \$84.00 – \$140.00
