No of coats: 2(min)
 Coverage: 6m² /litre/coat
 Drying time: 4-6 hours
 Full cure: 72 hours
 Clean up: Wash up with water
 Pack size: 1, 4 and 10 litre cans

TREDGRIP

RUBBERISED NON-SLIP COATING

Tredgrip is a waterbased, rubberised, non-slip paint that is easy to apply and provides a safe, hardwearing and decorative finish to a wide range of surfaces.

Low sheen, non abraive, tough and durable. Tredgrip has excellent weathering properties making it ideal for outdoor application.

Areas where Tredgrip can be used include – decks and patios, stairs and steps, walkways and footpaths, access ramps, boat decks, pool surrounds, sporting facilities, in fact Tredgrip can be used almost anywhere a non-slip decorative surface is required.

Tredgrip is low odour, easy to use, available in 12 popular colours and can be applied to surfaces such as concrete,

timber, steel, fibreglass, and aluminium.

Minor substrate movement including hair line cracks are easily covered with Tredgrip and because it is permanently flexible it will allow substrate expansion and contraction without any damage to the coating.

Tredgrip is resistant to a wide range of acids and alkalis and can withstand both salt water and chlorinated water but is not recommended for application in any area where it may be permanently immersed in water eg inside swimming pools and ponds etc.

Tredgrip will not adhere to ceramic tiles and should not be used on any areas where vehicles will be parked eg driveways and car parks.
